

When it comes to predictive maintenance, we know what's hot.

JERSEY INFRARED CONSULTANTS

COMPANY PROFILE

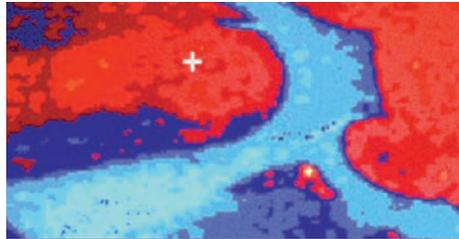

Jersey Infrared Consultants provide worldwide infrared inspection services for a wide variety of industrial and commercial applications. We offer qualitative and quantitative infrared inspections.

Since our incorporation in 1984, our list of satisfied clients has included Fortune 100 companies, government/military agencies and small to mid-size companies.

The high standards we set for service and reliability have earned us an excellent reputation in our field. All infrared surveys are performed by Certified Thermographers using state-of-the-art equipment with direct traceability to the National Institute of Standards Technology.

Our diverse inventory of equipment allows us to perform infrared surveys on FOOT, BY MOTOR VEHICLE, or AIRCRAFT. Survey results may be recorded on thermograms, videotape or computer disk in black and white and/or color.

We actively participate on a volunteer basis with: ASNT, ASTM and RCI to help develop specifications and guidelines for infrared thermography. Our staff members conduct seminars, publish technical articles, and conduct training classes on the applications of infrared testing.

WHY INFRARED?

- Predictive Maintenance
- Preventive Maintenance
- Quality Assurance
- Condition Monitoring
- Insurance Claims
- Legal Documentation

STANDARDS AND SPECIFICATIONS

- Certified Thermographers
- ASNT
- ASTM
- ANSI/NFPA
